Education

Vellore Institute of Technology (VIT) Vellore, India
M.Tech (Integrated) in Computer Science and Engineering (CGPA: 8.22) 2022 – 2027

Experience

Full Stack Web Developer Intern Nov 2024 – May 2025
XIBOTIX Pvt. Ltd India

- Built 8+ responsive web pages and 15+ reusable UI components using React, Next.js, and Tailwind CSS, improving development efficiency through modular design.
- Integrated 3+ backend modules with Express.js and MongoDB, enabling secure CRUD operations and seamless frontend-backend communication.
- Migrated the Mechmega website from Wix to a custom React application, rebuilding 10+ UI sections and improving maintainability and performance.
- Collaborated in a 3–5 member Agile team, contributing 20+ Git commits while following clean coding practices, version control, and code reviews.

Projects

DeployMind – AI-Powered Deployment Platform GitHub
Next.js, Express.js, FastAPI, Docker, PostgreSQL, Nginx, SSE, AWS

- Built an AI-powered CI/CD platform automating Git-based builds, Docker container deployment, and lifecycle management across 5 containerized microservices.
- Developed AI-driven root-cause analysis using Groq API and real-time log streaming with SSE and Nginx, generating actionable code fixes from build failures.

Grex – AI-Powered Team Collaboration Platform GitHub
Next.js, Express.js, FastAPI, Prisma ORM, Redis, Socket.IO, LangGraph, RAG

- Developed a full-stack collaboration platform featuring team workspaces, real-time chat, Kanban boards, meeting scheduling, file sharing, and role-based access control.
- Designed 25+ REST APIs and 10+ PostgreSQL models using Prisma ORM; integrated Socket.IO, React Query, and LangGraph-based RAG for real-time collaboration, semantic search, and document summarization.

PulmoGuard AI – Explainable Healthcare Risk Platform GitHub
Python, LightGBM, Scikit-Learn, SHAP, LangChain, FastAPI, Next.js, Docker

- Built a clinical risk screening platform using Logistic Regression and LightGBM, achieving **90.5% accuracy**, **0.70 ROC-AUC**, and **92.5% specificity** on 50K patient records.
- Integrated SHAP-based risk explanations, a FastAPI backend, and LangChain with Groq LLMs to generate grounded clinical reports through a Next.js dashboard.

Technical Skills

Programming: JavaScript, TypeScript, Python, Java, C/C++
Frontend Development: React.js, Next.js, Tailwind CSS, React Query, Redux, Zustand
Backend Development: Node.js, Express.js, FastAPI, REST APIs, JWT, Socket.IO, Prisma ORM
Databases: PostgreSQL, MongoDB, MySQL, Firestore, pgvector
AI/ML: LangChain, LangGraph, Retrieval-Augmented Generation (RAG)
DevOps & Cloud: Docker, GitHub Actions, Nginx, AWS, Vercel, Netlify
Tools: Git, GitHub, Postman, Linux

Certifications

- **Fundamentals of AI Agents Using RAG and LangChain** – IBM Coursera
